

The most widely used biscuit wheat in Western Europe

Advantage

High yield even in the driest years
8-10t/ha
Excellent lodging resistance
High bulk density
Intensive propagation

Agronomic properties

Optimum sowing : 15.9. - 15.10.
Yield: 4-4.2 million germinated grains/ha
Reproduction: excellent
Hardiness: good
Plant height: medium
Lodging: medium
Maturing: medium late
Ear: spurred

Quality

N substances: above 11,5-12,5%
Fall number: over 260 s
Zeleny test: 25-40 ml
Bulk density 790-800g/l

Alveographic quality

W 190-230
P/L 0,7-1,3

Disease resistance

Powdery mildew: medium hardy
Fusarium: moderately resistant
Wheat rust: moderately resistant
