

A good variety for malting and whiskey production

Semi-early variety of barley on 2 rows, of medium height, used in the beer malt production industry, with an excellent production potential and a stable yield.

Advantages

High yield: 9-10t/ha
It is widespread in Europe for its quality

Agronomic properties

Sowing 25.2. - 10.3. (25.10. - 5.11.)
Yield: 3.5-4 million/ha
Less susceptible stem to lodging
Plant height: low
Variety: very late

Quality

Protein content medium: low
Very good storability
Bulk density 660-680g/l

Disease resistance

Powdery mildew: moderately resistant
Glyphosphorus spot: less susceptible
Helminthosphorus spot: moderately resistant
Barley rust: less susceptible
